

BAC PRO - Aménagements paysagers

LANDSCAPING

The formation learns to develop and maintain landscaped spaces of very varied sizes and functions: pleasure gardens, nurturing gardens, therapeutic gardens, urban development, road and linear areas, recreational and sports spaces, cemeteries, brownfields, regional and national urban parks, cooperative development areas, ripisylve.

The learner carries out the earthworks of the infrastructures (traffic, walls, paving), the establishment of the networks and the revegetation.

During the implementation phase, he manages the human and material resources, contributes to the work and makes technical and logistical adjustments. It checks the quality of the work carried out and ensures that the overall time spent and the importance of the site are consistent.
